WORK EXPERIENCE

CrowdStrike

Mar. 2024 – Present

Principal Consultant, Platform Professional Services

Remote

- Promoted to Principal consultant after 11 months for performance and leading business critical initiatives driving revenue.
- In addition to responsibilities as a Senior consultant, provide scoping, oversight and leadership for complex Professional Services projects. Acted as a point of escalation for complex and challenging issues. Provided support and mentorship for consultants across the team.
- Designed an integration with Python for a Fortune 100 company that provided visibility into their containerized environment, resulting in a 40% reduction in their container vulnerability remediation timelines positively impacting their SLA.
- Built an integration for a large customer that provided tagging automation for millions of endpoints across various third-party data providers increasing visibility significantly.

Senior Consultant, Platform Professional Services

Apr 2023 – Mar 2024

- Led strategic deployment and technical support of CrowdStrike's Cloud Security solutions for enterprise clients, with expertise in Cloud Workload Protection (CWP) and Cloud Security Posture Management (CSPM) across diverse containerized environments.
- Engineered and maintained automation tooling using Python, Bash, and PowerShell that increased productivity for both internal professional services teams and customers.
- Focus on Kubernetes and cloud computing platform security and compliance on AWS, Azure and GCP.
- Developed standardized operational processes, conducted technical interviews for team expansion, created internal and external documentation.
- Architected a set of custom API integrations for a major state government client that automated security response workflows and enriched threat intelligence data, and reduced incident response times significantly.

Tanium

Jun. 2020 – Apr 2023

Senior Enterprise Services Engineer

Remote

- Consult with customers to deploy, maintain, troubleshoot and administer the Tanium platform to provide solutions for various areas such as patching, compliance and vulnerability, software and asset management, threat response and file integrity monitoring.
- Developed automation and integrations using REST APIs with Python, PowerShell and Bash as well as client-side scripts to be used with the Tanium Platform.
- Created custom content and contributed to improvements of existing content and solutions.
- Implemented a complex CI/CD pipeline at a top banking customer which resulted in a large renewal to take place.

Northrop Grumman

Sep. 2016 – Jun. 2020

Systems Administrator

Northridge, CA

- Primary systems administrator for multiple unclassified and classified programs with Windows and Linux client and server infrastructure.
- Scripting and automation of vulnerability remediation and other systems administration tasks.
- Responsible for all aspects of the system lifecycle including security, compliance, audit logging and upgrades.
- Migrated all and upgraded server operating systems and infrastructure to virtualization on the Nutanix platform.
- Planned and deployed SCCM, multiple HPC clusters, Splunk, Grafana and ServiceNow.

NFL

Frequency Coordinator

Sep. 2016 – Jan. 2017

Los Angeles, CA

- Tracked RF and troubleshoot radio frequency systems within the stadium for the Los Angeles Rams in the 2016 season.
- Provided technical support and coordination for various organizations in the stadium and on field.

Priority Technology Solutions

Information Technology Specialist

Apr. 2014 – Sep. 2016

Santa Clarita, CA

- Server, client and network management for business clients throughout the greater Los Angeles area.
- Troubleshooting and resolution of complex issues with hardware and software.

EDUCATION

Certification

- MCSA: Windows Server 2016
- CompTIA: A+, Network+, Security+ (expired)

College of the Canyons

Attended 2012-2014

- General education courses. Obtained 20 credits toward AA.
- Left college prior to graduating to pursue career goals.

SKILLS AND INTERESTS

- **Skills:** Windows and Linux operating systems; cloud security; scripting; automation; Python; PowerShell; Bash; systems administration; monitoring and alerting; Grafana; Prometheus; networking; cloud: AWS; Azure; GCP; Splunk; git; REST and GraphQL API; virtualization; security; compliance; vulnerability management; patching; Active Directory; database; CSPM; ASPM; DSPM; CNAPP; CWPP; SCCM; Tanium; CI/CD pipelines, containers, Docker, Kubernetes, Jenkins, DevOps.
- **Interests:** Guitar and drums; technology; dogs; hiking; snowboarding; Muay Thai; fitness; technology, traveling; cooking; home renovation
